FOR THE YEAR 1812.—No. I.

—
THE HONEST MAN'S
ALMANAC,

FOR THE CITY OF PITTSBURGH AND THE SURROUNDING
COUNTRY.

*The Calendar pages calculated by the Rev. JOHN TAYLOR,
and the rest filled up by R. PATTERSON.*

THIS ALMANAC, BEING A NEW ONE, CONTAINS NOTHING TO EN-
COURAGE THE EVIL PRACTICES OF LIARS, DRUNKARDS,
ROGUES, LAZY FELLOWS, INFIDELS, TORIES, COWARDS, BAD
HUSBANDS, AND OLD BACHELORS.

What it does contain must be learned by reading it.—
Among other things, it gives some account of PITTS-
BURGH, with a *Directory* to find any of the most ex-
tensive

Factories, Stores and Establishments

In or near it, and the residence of the *Lawyers, Doctors*
and *Magistrates* that live in it.

*The poetic pieces are chiefly taken from an old Almanac, called "Poor
Richard's," published 60 or 70 years ago by Dr. Franklin.*

THE PRESIDENT'S ALMANAC

Contains the President's Message of June 1, that gave rise
to the *Declaration of War* by Congress on the 18th June,
1812, against the British Government.

The next No. of the "HONEST MAN'S ALMANAC," which
will be for 1814, No. II. will contain sundry hints on se-
veral subjects, that will be of service if the reader will
only make a good use of them—such as, the pleasant
and the cross wife; the good and the bad lawyer; the
worthy and the unworthy doctor; the useful and the use-
less clergyman; the just and the unjust merchant; the
happy and the unhappy mechanic, &c. &c. &c.

*This Almanac is made for honest men and worthy families—
yet the dishonest may use it, without any danger of being
injured by it.*

ECLIPSES

In the year 1813, are four, viz. two of the sun and two of the moon.

First of the sun, February 1st, at 3h. 16m. morning—therefore invisible in the United States.

Second, of the moon, February 15, visible at Pittsburgh, and over all the United States.

Beginning of the eclipse,	1h 50m morning
Middle of the eclipse	3 16 morning
End of the eclipse	4 42 morning
Digits eclipsed, 7° 45'	on the moon's south limb.

Third, of the sun, July 27th, at 9h. 23m. morning, but not visible in the United States, on account of the moon's latitude being south.

This eclipse will be visible in South America, at Buenos Ayres, Monte Video, and a southern district of Brazil.

Fourth, of the moon, August 11th, visible at Pittsburgh, and through all the circumjacent country.

Beginning of the eclipse,	8h 20 $\frac{1}{2}$ m afternoon
Middle of the eclipse,	9 27 afternoon
End of the eclipse,	10 34 afternoon
Digits eclipsed, 4° 25'	on the north limb of the moon.

 To find the Sign, you will look in the column right of the *sun-set column*—For instance, what part does the sign govern on the 1st of January? In the column mentioned, Sagittarius ♐ will be found opposite the 1st day of the month, and the government of the *things* is consigned to it.

The man of pure and simple heart
 Through life disdains a double part;
 He never needs the screen of lies
 His inward bosom to disguise.
 In vain malicious tongues assail,
 Let envy snarl, let slander rail,
 From virtue's shield (secure from wound)
 Their blunted venom'd shafts rebound.

LAWYERS.

I know you lawyers can, with ease,
Twist words and meanings as you please ;
That language, by your skill made pliant,
Will bend to favour ev'ry client ;
That 'tis the fee directs the sense
To make out either side's pretence :
When you peruse the clearest case,
You see it with a double face ;
For scepticism's your profession ;
You hold there's doubt in all expressions
Hence is the bar with fees supply'd.
Hence eloquence takes either side.
Your hand would have but paltry gleanings ;
Could ev'ry man express his meaning.
Who dares presume to pen a deed,
Unless you previously are feed ?
'Tis drawn, and, *to augment the cost* ;
In dull prolixity engrost :
And now we're well secur'd by law,
Till the next brother find a flaw.

THE COUNTRY MAN.

Happy the man whose wish and care
A few paternal acres bound,
Content to breathe his native air,
In his own ground.
Whose herds with milk, whose fields with bread,
Whose flocks supply him with attire,
Whose trees in summer yield him shade,
In winter fire.
Blest, who can unconcernedly find
Hours, days and years slide soft away ;
In health of body, peace of mind,
Quiet by day.
Sound sleep by night ; study and ease
Together mixt ; sweet recreation ;
And innocence which most does please,
With meditation,
Thus let me live, unseen, unknown,
Thus unlamented let me die,
Steal from the world, and not a stone
Tell where I lie.

Of all the causes which conspire to blind
 Man's erring judgment, and misguide the mind;
 What the weak head with strongest bias rules,
 Is pride, that never-failing vice of fools.
 Whatever nature has in worth deny'd,
 She gives in large recruits of fulsome pride.

Without repentance none to heav'n can go,
 Yet what repentance is few seem to know:
 'Tis not to cry out mercy, or to sit
 And droop, or to confess that thou hast fail'd;
 'Tis to bewail the sins thou dost commit,
 And not commit those sins thou hast bewail'd.
 He that bewails, and not forsakes them too,
 Confesses rather what he means to do.

For forms of government let fools contest,
 Whate'er is best administer'd is best:
 For modes of faith let graceless zealots fight,
 His can't be wrong, whose life is in the right:
 All must be false that thwart this one great end,
 And all of God, that bless mankind, or mend.

 It's every Christian's duty to forgive.

 Revenge of past offences is the cause
 Why peaceful minds consented to have laws.

O, form'd Heav'n's dictates nobly to rehearse,
 Preacher Divine! accept the grateful verse.
 Thou hast the pow'r the harden'd heart to warm,
 To grieve, to raise, to terrify, to charm;
 To fix the soul on God, to teach the mind
 To know the dignity of human kind;
 By stricter rules well govern'd life to scan,
 And practise o'er the angel in the plain.

Celestial patience! how dost thou defeat
 The foe's proud menace, and elude his hate?
 While passion takes his part, betrays our peace;
 To death and torture swells each slight disgrace;
 By not opposing, thou dost ill destroy,
 And wear thy conquer'd sorrows into joy.

Can wealth give happiness? look round and see,
 What gay distress! what splendid misery!
 Whatever fortune lavishly can pour,
 The mind annihilates, and calls for more.
 Wealth is a cheat, believe not what it says;
 Greatly it promises, but never pays.

Don't after foreign food and cloathing roam,
 But learn to eat and wear what's rais'd at home.
 Kind nature suits each clime with what it wants,
 Sufficient to subsist th' inhabitants.
 Observing this, we less impair our health,
 And by this rule we more increase our wealth.

Extract from the Preamble to the articles of association, adopted by the Cumberland county Theological Library.

“Of all knowledge, the knowledge of our duties is certainly the most important. No culture is more necessary than the moral culture of the heart. Human laws reach only to overt acts, and do but imperfectly restrain men from the commission of crimes. Religious considerations alone are calculated to reach the heart, and secure that on the side of virtue. In this view, the Bible is undoubtedly the best book ever published. Next to the Bible are to be ranked those useful religious books, which illustrate christian doctrines and duties. Many new and interesting works of this kind are daily publishing both in Europe and America. Few individuals, however, except among the opulent, are able to purchase all the books of this kind, which they may have leisure and inclination to read. But by a union of pecuniary efforts, among all who are well inclined to the cause of religion, a large and respectable religious library is, with a trifling expense to individuals, easily established. All persons friendly to the diffusion of religious knowledge, and especially parents, who wish to promote a taste for reading religious books in their families, on the Sabbath, or at other times, are invited to lend their aid to promote an institution which bids fair to be extensively useful to the community, and especially to the rising generation, whose benefit will be consulted in the choice of such books as may amuse and instruct them, without corrupting their hearts.”

N. B. Almost any neighbourhood in the western country, by imitating the above example, might commence, and by perseverance, acquire a valuable library. There are already many such in the western country, especially in the state of Ohio, and the booksellers feel particular pleasure in liberally encouraging them.

[*The Directory for 1814 will be considerably enlarged.*]

The Editor of an English work lately published for the use of Farmers and Gardeners, by foretelling changes in the weather, &c. observes, that

“When the Swallows fly high after their prey we think ourselves sure of a serene sky; but when they fly low and brush the surface of the water with their wings, we judge that rain is not far off.

When the Gnats collect themselves before the setting of the sun, and form a sort of vortex, in the shape of a column, it announces fine weather.

The Earth after a very long and abundant rain, is sometimes seen to be almost dry, and the roads quite free from dirt. This is a sign that the rain has not altogether ceased; and denotes a continual efflux of electric matter, which, being renewed, carries with it, in the form of vapour, all the moisture that falls on the earth.

There is sometimes a great deal of dirt after a very moderate rain; this is a sign of fine weather; because it indicates that evaporation has ceased.

There is no surer sign of rain than two different currents of clouds, especially if the under currents appear in hot weather, they shew that a thunder storm is gathering.”

On wet and dry seasons the following rules are laid down:—“When there has been no storm before or after the vernal equinox, the ensuing summer is very dry at least five times in six.

When a storm happens from the east, either on the 19th, 20th, or 21st of March, the succeeding summer is dry, four times in five.

When a storm arises on the 25th, 26th, or 27th of March, and not before, in any point, the succeeding summer is wet four times in five.

If there should be a storm at south west, or west south west, on the 19th, 20th, 21st, or 22d, the succeeding summer is generally wet, five times in six. It rains less in March than in November, in the proportion of seven to twelve.

It rains generally less in April than in October, in the proportion of one to two: and less in May than September, in the proportion of three to four.

When it rains plentifully in May, it generally rains but little in September; and the contrary.

Out of 41 years there will in general be 21 dry springs, six wet, and 13 variable ones, also 20 wet summers, 16 dry, and five variable ones, and probably, 11 dry autumns, 11 wet, and 19 variable ones.

The quantity of rain which falls in nine successive years is nearly equal to that which falls in the next following nine. and every 19th year is generally similar. This similarity was very striking between the temperature of the years 1701, 1720, 1739, 1758, and 1777."

LYING.

Whilst the charge of lying is offensive to every person, is it not astonishing that so many, in all the different ranks of society, should be found daily practising this pernicious vice? Some for sport,—some for gain,—some for an affected display of wit,—some from envy and malice,—and all because they have not the love of truth in them, but would rather be like the devil, who is the father of lies, & of liars. Who would choose to have a parent, a child, an husband, a wife, an apprentice, a servant, a master, or a neighbour, perpetually addicted to lying?—Then what you do not like in another, do not practice yourself.

PROFANE SWEARING.

This unreasonable, unprofitable and impious vice prevails to an alarming degree. Whilst all religious denominations raise their voice against it, still it prevails.

It is matter of doubt, who practises it most, whether the fine dressed gentleman, or the clown in tatters and rags.

Wm Coleman 8592

Some think that merchants are the greatest adepts; while others say that certain lawyers will not yield on this score to any body living, not excepting even boatmen and waggoners; others again give their decision in favour of the notorious drunken cabals in grog-shops; but some allege that the boldest profanity, cursing, swearing and blasphemy against the God of heaven, are heard at the card table, and in gambling rooms, frequented by modern bucks, beaux, rakes, and other idlers, who (if no wife be already afflicted with their vicious habits) are candidates for becoming useless old bachelors, should their constitution be able to bear up under a load of years.

While it must, with pleasure, be granted, that mechanics and farmers are least chargeable with this detestable vice, it is the opinion of sober people in Pittsburgh, that the boys and children in the streets present the lamentable prospect, through the fault of their parents and masters, of far exceeding all that ever have gone before them in the practice of this vice.

NON IGNORAMUS.

DRUNKENNESS.

Extract from a sermon of the Rev. E. Porter.

Isaiah v. 11.

“Woe unto them that rise up early in the morning, that they may follow strong drink,” &c.

“It may be safely affirmed that drunkenness has proved a greater foe to human life and happiness than war, pestilence, and famine. How many that were born with reason, has it transformed into idiots!—How many men of property and usefulness, has it turned into contemptible drones!—How many families has it driven from their dwelling to the streets,—from affluence to indigence and woe.—It breaks through all restraints of authority and decency. It sweeps away our young men to infamy and the grave. It defies our laws. It threatens destruction to our morals.”

“The drunkard’s account is commonly a short one:—business neglected,—foolish bargains contracted,—credit ruined,—land, house and furniture mortgaged:—then the sheriff and the prison stand ready to close up the reckoning.”

After enumerating the wounded feelings that the drunkard gives to his friends and relatives, Mr. Porter adds—“Will you attend me to the solitary cottage, which intemperance has made the abode of wretchedness? Scarcely does its tattered covering afford a shelter from the cold wind and

the drenching rain. See an once able woman, bred, perhaps, in ease and prosperity, now destitute of every earthly comfort. The bloom of her face is succeeded by premature wrinkles; and the countenance, that once beamed with joy, has become meagre and pale with suffering.— Helpless, friendless, there she sits, the victim of grief. Her poor children around her, naked, shivering, starving, cry for bread. He that solemnly covenanted to provide for her in sickness, and in health, leaves his family to want and woe. . . breaks from all the duties and endearments of home, to gratify a vile appetite. Behold the husband, the father, returning from the tavern or grog-shop, a stammering, reeling drunkard! His stomach heaves: his tongue curses and threatens: what deed of violence is he not liable to commit! Oh, the pangs of his heart-broken wife, and affrighted children! Is this a fiction? Would to God it were. But how many wretched mothers, with their helpless offspring, even in this land of plenty, are left to drag out this life of suffering; while the men, designated by God and nature to be their friends and guardians, are wasting their substance in rioting and drunkenness!”

“Drunkenness produces a miserable death;” yet however awful the truth may be, that the drunkard’s neglect of religious duties, and stupified conscience render him unfit to appear before his Maker in judgment,—his death generally relieves his relatives from a useless burden, and the world from a loathsome drone.—Who would then be a drunkard, to live in disgrace, and die in wretchedness?

OLD BACHELORS.

The God of nature has manifestly designed the happiest state of human society to be in the domestic circle, which rarely subsists with any just claim to esteem and reputation, but when constituted and sanctioned by marriage; yet the old bachelor is a fellow that despises this wise ordinance of heaven, and lives as if he believed the sacred declaration to be false, “That it is not good for man to be alone.”

He is one, who, if all his predecessors had lived as he lives, never would have come himself legitimately into life. He is generally one, who in early life, suppressed and destroyed the virtuous feelings that would have prompted him to secure for life the company of an affectionate wife, with whom he might have been a respectable member of the community.—And every young man, who feels an indifference taking place in his mind, respecting marriage, is in danger of becoming this useless and often contemptible human drone.

There is but one character more to be feared and more to be detested by the ladies than an old bachelor,—and that is a *bad husband*, that wounds the feelings of his wife, by the fist of wickedness,—by a bitter tongue,—by drunkenness,—by lust, or by any vice that makes him a tormentor to his wife.

THE OLD BACHELOR'S LAMENTATION.

FROM THE PORT FOLIO.

I'm an old bachelor, half way down
My life's declivity,
Although the sweetest girls in town
Once set their caps for me.

No loving wife at home have I,
No prattlers on my knee ;
And if I live, or if I die,
None cares a groat for me.

Yet I was once as blythe and gay
As Sky-lark on the wing,
Was all the ton in dance or play
To frolic or to sing.

But now an odd old put am I,
A stupid wretched thing,
And might as well attempt to fly,
As frolic, dance, or sing.

Infidels, by persuading men to disbelieve the doctrine of a state of rewards and punishments in the world to come, as taught in the Bible, do what lies in their power to corrupt the morals, and increase the miseries of mankind.

Lazy persons, while they expose themselves to vice, poverty and disgrace, are worthless drones, who are supported at the expense of the industrious and active part of the community.

When traitors and cowards, (such as Arnold in the revolutionary war, and H-ll of Detroit memory, in the present war) do the deeds that blast their name with perpetual infamy, if the mischief fell on themselves only, they might be ranked with other defaulters ; but their crimes become black and aggravated beyond calculation, by bringing into danger and often into ruin, the peace, happiness, wealth and prosperity of their country.

PATTERSON AND HOPKINS

Have for sale, at all times, a large assortment of valuable books, and recent publications from the eastern side of the mountains, with an extensive assortment of school books, pocket and family Bibles, at various prices, according to their quality.

P. & H. have of their own publications for sale,—Mason's Remains, a small and excellent religious book—25 Cents.—Observations on the Two Sons of Oil, containing an able defence of religious liberty, and of the American laws and constitutions; also an excellent compendious review of Church history.—By Wm. Findley Esq. member of Congress. § 1.—Murrays small English Grammar, a book necessary to every young person, that wishes to speak and write correctly. 25 Cents.—The New Token for children, or a sequel to Janeway's Token,—being an authentic account of the conversion, lives, and happy deaths of twelve children, by the Rev. Wm. Mosely,—18 $\frac{3}{4}$ Cents.—Easy Lessons for children—6 $\frac{1}{2}$ Cents.—The Child's Instructor 12 $\frac{1}{2}$ Cents.—Gentle Shepherd, 25 cents.

Patterson and Hopkins have now in the press and will shortly publish, Willison's Explanation of the Catechism, fine paper—100 Cents. Watts' Psalms and Hymns, 75 Cts. A new collection of tunes, containing those that are used in the western country by the different Presbyterian denominations, and by some other churches. This collection embraces the plain excellent old Scotch tunes, that have been but rarely published in this country; with others, very generally used. The design of the collection is to furnish the church with a cheap and useful set of tunes actually used in the western country. 50 Cents. A very liberal discount on the above prices is given to those who buy by the dozen, to sell again.

P. & H. give 5 cents a pound for clean white lincn and cotten rags; and if they are very coarse, dirty, or dark coloured, from 1 cent to 4 per lb. according to their quality. One cent per lb. for clean dry flax and hemp scutching tow, and for woollen and linsey rags.

Some persons manifest a sort of shame on the subject of saving and selling rags, that ought not to be cherished, when it is considered how much money is retained in the country by saving them, and when it is known, which is a fact, that the most respectable and decent families in the country do now encourage domestic manufactories in this way.

Conclusion.—"Honesty is the best policy," and another best, is to "owe no man any thing but love." Rom. xiii. 8.
